

Information for Authors of LNP contributions

Attached you find the files needed for setting up the contribution:

- author.tex
- figure.eps
- referenc.tex
- svmult.cls
- svmultphys.clo
- svind.ist

Please take into account the instructions given in

- authinst.pdf
- refguide.pdf
- authsamp.pdf (which is just a very short sample file, which shows what it should look like if you have used the template and the style-files properly)

which provide information especially about the fine-tuning of the text and the format of the References (as in referenc.tex, which differs a little from the formats mostly used).

You should also be aware of the fact that everything is printed in black and white. So, if you insert color-figures, please make sure that they are also readable and understandable when printed in black and white only.

In addition we will need from you the copyright transfer statement, which is attached in this package as word- and as pdf-file in the (LNP_EDT_CTS.doc or LNP_EDT_CTS.pdf).
