

## Highlights from PHENIX - II

T.C. Awes<sup>a</sup> and for the PHENIX Collaboration<sup>b</sup>

<sup>a</sup>Oak Ridge National Laboratory,  
Oak Ridge, TN, 37831, USA, *awes@mail.phy.ornl.gov*

The Relativistic Heavy Ion Collider at BNL has now provided p - p, d - Au, Cu - Cu, and Au - Au collisions at several beam energies. Recent highlights from the PHENIX experiment for particle production at high transverse momentum, and for rare processes such as direct photon and lepton pair production are presented.
